

## ... Health Care Reform 2010

The Patient Protection and Affordable Care Act of 2010 (and accompanying Health Care and Education Affordability Reconciliation Act of 2010) is now law. How we got here is history, although quite interesting history for those of us who follow the legislative process.

This bill is remarkable in its size, complexity and cost. We try to keep our email alerts brief and manageable, and the Act is too massive to summarize in a single email alert. Plus, we believe that it will be easier to comprehend the significant provisions when presented on a topical basis.

Therefore, we will publish a series of emails over the next six weeks, addressing the following major topics in the Act:

Week 1	Individual and group market reforms
Week 2	Health insurance market reforms
Week 3	Grandfathered plans
Week 4	Health insurance exchanges
Week 5	Individual and employer responsibility
Week 6	Revenue provisions

We look forward to assisting you with compliance and benefits planning under this landmark Act.

March 29, 2010
